## 1 ZServo

Arduino Servo Lib with ros.

## 2 Data Structure Index

### 2.1 Data Structures

Here are the data structures with brief descriptions:

<a href="#">ZServoPCA9685</a>	<a href="#">2</a>
-------------------------------	-------------------

## 3 File Index

### 3.1 File List

Here is a list of all files with brief descriptions:

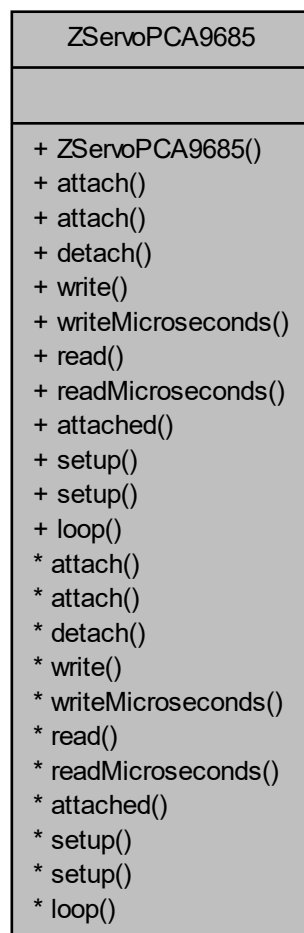

<a href="#">ros.h</a>	<a href="#">8</a>
<a href="#">ithROS/ros.h</a>	<a href="#">9</a>
<a href="#">ZServoPCA9685.cpp</a>	<a href="#">9</a>
<a href="#">ZServoPCA9685.h</a>	<a href="#">11</a>

## 4 Data Structure Documentation

### 4.1 ZServoPCA9685 Class Reference

```
#include <ZServoPCA9685.h>
```

Collaboration diagram for ZServoPCA9685:

#### Public Member Functions

- [ZServoPCA9685](#) (ZPCA9685 \*myZPCA9685)

#### API like Servo.h

- `uint8_t attach (int pin)`
- `uint8_t attach (int pin, int min, int max)`
- `void detach ()`
- `void write (int value)`
- `void writeMicroseconds (int value)`
- `int read ()`
- `int readMicroseconds ()`
- `bool attached ()`

#### API for ROS

- `void setup (ros::NodeHandle *myNodeHandle, const char *topic, void callbackinstance(const std_msgs::<UInt16 &cmd_msg), int pin)`
- `void setup (ros::NodeHandle *myNodeHandle, const char *topic, int pin)`
- `void loop ()`

#### 4.1.1 Detailed Description

Definition at line 34 of file ZServoPCA9685.h.

#### 4.1.2 Constructor & Destructor Documentation

##### 4.1.2.1 ZServoPCA9685()

```
ZServoPCA9685::ZServoPCA9685 (
    ZPCA9685 * myZPCA9685 )
```

constructor of the class

##### Parameters

<i>myZPCA9685</i>	the instance of ZPCA9685 driver associated to the board.
-------------------	--

Definition at line 32 of file ZServoPCA9685.cpp.

#### 4.1.3 Member Function Documentation

##### 4.1.3.1 attach() [1/2]

```
uint8_t ZServoPCA9685::attach (
    int pin )
```

attach the given pin to the next free channel, sets pinMode, returns channel number or 0 if failure

Definition at line 41 of file ZServoPCA9685.cpp.

References DEBUG.

Referenced by setup().

Here is the caller graph for this function:

#### 4.1.3.2 attach() [2/2]

```
uint8_t ZServoPCA9685::attach (
    int pin,
    int min,
    int max )
```

as above but also sets min and max values for writes.

Definition at line 51 of file ZServoPCA9685.cpp.

References `DEBUG`.

#### 4.1.3.3 attached()

```
bool ZServoPCA9685::attached ( )
```

return true if this servo is attached, otherwise false

Definition at line 88 of file ZServoPCA9685.cpp.

#### 4.1.3.4 detach()

```
void ZServoPCA9685::detach ( )
```

Definition at line 60 of file ZServoPCA9685.cpp.

References `DEBUG`.

#### 4.1.3.5 loop()

```
void ZServoPCA9685::loop ( )
```

function to be called in your main loop.

loop : on loop before `NodeHandle::refresh(spinOnce)`, call this to update the topic

Definition at line 233 of file ZServoPCA9685.cpp.

#### 4.1.3.6 read()

```
int ZServoPCA9685::read ( )
```

returns current pulse width as an angle between 0 and 180 degrees

Definition at line 78 of file ZServoPCA9685.cpp.

#### 4.1.3.7 readMicroseconds()

```
int ZServoPCA9685::readMicroseconds ( )
```

returns current pulse width in microseconds for this servo (was read\_us() in first release)

Definition at line 83 of file ZServoPCA9685.cpp.

#### 4.1.3.8 setup() [1/2]

```
void ZServoPCA9685::setup (
    ros::NodeHandle * myNodeHandle,
    const char * topic,
    void callbackinstanceconst std_msgs::UInt16 &cmd_msg,
    int pin )
```

the ros initialisation, it replace attach.

note the ZPCA9685 must be initialised before.

setup : At setup after NodeHandle setup, call this to initialise the topic

##### Parameters

<i>myNodeHandle</i>	the ROS node handler
<i>topic</i>	the topic displayed in ROS
<i>callbackinstance</i>	the callback executed when a topic is recieved
<i>pin</i>	the generic pin number associated to the topic

Definition at line 222 of file ZServoPCA9685.cpp.

References attach(), and DEBUG.

Here is the call graph for this function:

#### 4.1.3.9 setup() [2/2]

```
void ZServoPCA9685::setup (
    ros::NodeHandle * myNodeHandle,
    const char * topic,
    int pin )
```

the ros initialisation, it replace attach .

note the ZPCA9685 must be initialised before.

##### Parameters

<i>myNodeHandle</i>	the ROS node handler
<i>topic</i>	the topic displayed in ROS
<i>pin</i>	the generic pin number associated to the topic

Definition at line 203 of file ZServoPCA9685.cpp.

References attach().

Here is the call graph for this function:

#### 4.1.3.10 write()

```
void ZServoPCA9685::write (
    int value )
```

if value is < 200 its treated as an angle, otherwise as pulse width in microseconds

Definition at line 66 of file ZServoPCA9685.cpp.

References DEBUG.

#### 4.1.3.11 writeMicroseconds()

```
void ZServoPCA9685::writeMicroseconds (
    int value )
```

Write pulse width in microseconds

Definition at line 72 of file ZServoPCA9685.cpp.

References `DEBUG`.

The documentation for this class was generated from the following files:

- [ZServoPCA9685.h](#)
- [ZServoPCA9685.cpp](#)

## 5 File Documentation

### 5.1 README.md File Reference

### 5.2 ros.h File Reference

```
#include <ros.h>
```

Include dependency graph for `ros.h`:

This graph shows which files directly or indirectly include this file:

### 5.3 ros.h File Reference

```
#include <ros.h>
```

Include dependency graph for ithROS/ros.h:

This graph shows which files directly or indirectly include this file:

### 5.4 ZServoPCA9685.cpp File Reference

```
#include <assert.h>
```

```
#include <WProgram.h>
```

```
#include "ZServoPCA9685.h"
```

Include dependency graph for ZServoPCA9685.cpp:

## Macros

- `#define DEBUG(a) {}`
- `#define ZSERVO_MAX 16`

## Variables

- `ZServoPCA9685 * myservo [ZSERVO_MAX] = {0,0,0,0,0,0,0,0,0,0,0,0,0,0,0,0}`

### 5.4.1 Detailed Description

#### ZServo

Arduino library for Servo Author : Pierre Valteau history : add ros supports

### 5.4.2 Macro Definition Documentation

#### 5.4.2.1 DEBUG

```
#define DEBUG(
    a ) {}
```

Definition at line 15 of file ZServoPCA9685.cpp.

Referenced by ZServoPCA9685::attach(), ZServoPCA9685::detach(), ZServoPCA9685::setup(), ZServoPCA9685::write(), and ZServoPCA9685::writeMicroseconds().

#### 5.4.2.2 ZSERVO\_MAX

```
#define ZSERVO_MAX 16
```

Definition at line 27 of file ZServoPCA9685.cpp.

### 5.4.3 Variable Documentation

#### 5.4.3.1 myservo

```
ZServoPCA9685* myservo[ZSERVO_MAX] = {0,0,0,0,0,0,0,0,0,0,0,0,0,0,0,0}
```

Definition at line 28 of file ZServoPCA9685.cpp.

## 5.5 ZServoPCA9685.h File Reference

```
#include <WProgram.h>
#include <ZPCA9685.h>
#include <ros.h>
#include <ros/time.h>
#include <std_msgs/UInt16.h>
```

Include dependency graph for ZServoPCA9685.h:

This graph shows which files directly or indirectly include this file:

### Data Structures

- class [ZServoPCA9685](#)

### Macros

- `#define` [ROS\\_USED](#)

#### 5.5.1 Detailed Description

#### [ZServoPCA9685](#)

dependency :

This library use the folowing ones : ZPCA9685, PinExtender,Rosserial\_Arduino\_Library you can find it on <https://github.com/zoubworldArduino/>

Library that manage servo with ros on a board with a PCA9685.  
This library offer the same API as the arduino library Servo.

## 5.5.2 Macro Definition Documentation

### 5.5.2.1 ROS\_USED

```
#define ROS_USED
```

Definition at line 17 of file ZServoPCA9685.h.
